ParkingVision

PARKINGVISION FREEFLOW · CORE PRODUCT

Park without barriers. Pay without an app.

Barrier-free parking management for shopping centres, public car parks, properties and company premises. Cameras capture the plates, your customers pay by QR code in the browser — and you keep the overview in the operator portal at all times. With a parking fee.

No app required

No barrier maintenance

With parking fee

CH · DE · AT

STARTING POINT

Three cost drivers — three clear answers

Barriers, undetected unauthorised parkers and pay machines tie up capital and staff. ParkingVision FreeFlow replaces all three with cameras, a portal and the QR code.

Barrier costs and queues

Purchase, maintenance, faults — and tailbacks at the entrance at peak times.

WITH FREEFLOW

No mechanism: the camera captures as the vehicle passes. Traffic keeps flowing.

Unauthorised parkers and lost revenue

Without gapless capture, long-stay and unauthorised parkers remain undetected and impossible to prove.

WITH FREEFLOW

Every session documented with plate, time stamps and a photographic record.

The cost of pay machines

Servicing, emptying, repairing — and your customers still stand in a queue.

WITH FREEFLOW

Payment is by QR code on the driver's own phone. A machine stays an option, not an obligation.

HOW IT WORKS

How it works — in three steps

1 Drive in

The camera captures the plate automatically — no ticket, no stopping, no barrier.

2 Pay by QR code

Scan the QR code, enter the plate, pay — in the browser, with no app and no registration.

3 Drive out

The exit camera closes the session. Paid? Safe journey — with no waiting.

BENEFITS

What you get out of it

More revenue, fewer losses

Parking notice with evidence — camera image and time stamps for every open case, PDF at a click. The decision stays with you.

Tariffs in the portal — free minutes, hourly rate and daily maximum per site. Planned: prices by occupancy and special days.

Shopping discount at the till — «free parking from a minimum purchase» as an audited single-use voucher, with no till integration.

Analyses — revenue, occupancy and payment rate from day to year, per site and in total.

Less effort in day-to-day operation

Operator portal — a live overview of movements, sessions, tariffs and analyses, per site and across all sites.

Permits and vouchers — permanent authorisations, guests, self-registration by tradespeople with approval, all audited.

Mobile patrol round — check or scan plates on the premises with a smartphone, with a log.

24/7 monitoring — faults are detected and, if you wish, escalated to a control centre.

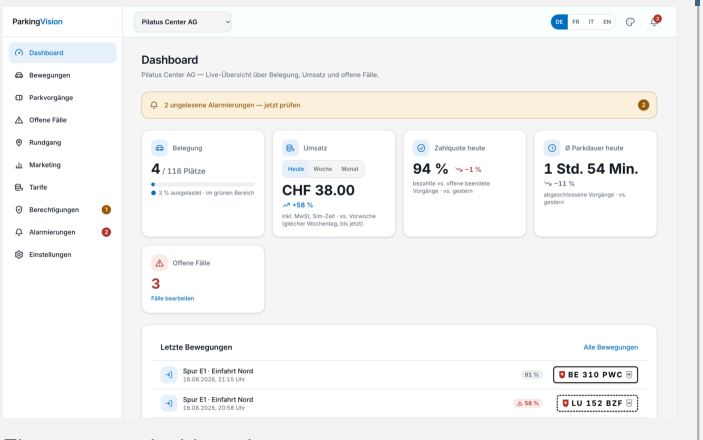

The best experience for your customers

Payment without an app — scan the QR code, enter the plate, pay. Receipt on the phone or by email.

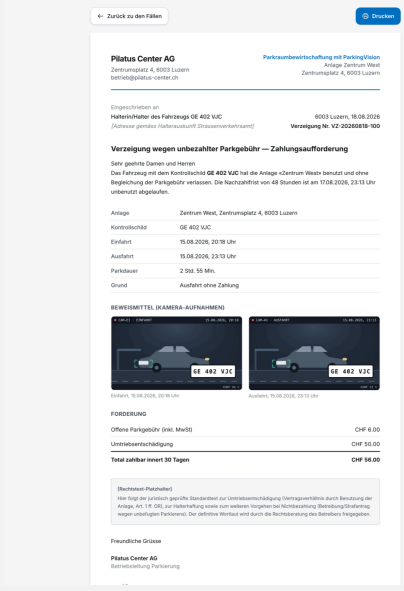

Pay station as an option (planned) — for customers without a smartphone, the same payment flow with a card terminal, paperless.

Four languages — DE, FR, IT, EN. Payment page in the browser, with no app and no registration.

Your look, your brand — the operator's logo, colour and wording on every customer-facing surface and receipt.

The operator dashboard — occupancy, revenue, payment rate and movements

Parking notice at a click — with evidence images and payment slip

PART OF THE PLATFORM

ParkingVision is a modular platform on a shared camera and portal base. FreeFlow is the core — combinable with the other products in the family:

FreeFlow | Secure | Access | Smart | Parkleitsystem

WHO IT IS FOR

Shopping centres and malls

Drive in without stopping, time in the centre instead of at the machine — vouchers link the parking fee to sales.

Municipalities and public car parks

High throughput without queues at the barrier, every session documented without gaps.

Property managers

Quota as agreed in the lease, visitor spaces allocated by the tenants themselves — without a phone call.

Company car parks and premises

Staff with a permanent authorisation, visitors and tradespeople enabled for a limited period.

OPERATION AND DATA PROTECTION

Revenue model	Parking fee (end customer) plus SaaS licence per site
Hosting	Switzerland — usable in Switzerland and the EU
Data sovereignty	With the operator, strictly separated per client
Vehicle-keeper lookup	None — plates stay in the operator's system
Regulation	Designed to comply with the GDPR and the revDSG
Plates	CH, DE and AT
